Couldn't see the before picture? Can't show all in one post. Check the "preview" link below the picture (right column, first row). If that doesn't work for you, copy the URL of the picture that is now displayed and paste it in the textbox at the top of the page to see it. New Picture displaying in the preview window A picture can be deleted from the "preview" window by pressing the delete button on the keyboard. Next to the preview button there is a small clock. Press the clock button to see when the picture in the preview window will be refreshed. If you press the clock button without a photo in the preview window, you see a different clock. (This is good, because you get to watch the preview and see how often the next picture is displayed). You can also use the "pause" button. If you don't want to show some pictures and you will soon see all in the "preview" window, you can empty the "preview" window by pressing the "clear" button on the keyboard, and then you will get the next picture in the "preview" window. NB! Only pictures with URLs that start with "http" are shown in the preview window.
