Download XFORCE.Q: How to cancel timer in JFrame I am creating one JFrame. In that i am going to play audio for some time. So i need to cancel this sound after playing certain time. For that i have created a Timer for that. Please tell me how to cancel this timer in JFrame. A: You can't cancel the timer, you'll have to re-create it. If you need an event to do this, use something like this: public static void stopTimer(Timer timer) { if (timer!= null) { timer.stop(); timer = null; } } It will also be necessary to create a new Timer on the main thread: Thread.currentThread().setContextClassLoader(myClass.class.getClassLoader()); Timer timer = new Timer(); timer.schedule(...); ... Thread.sleep(...); stopTimer(timer); 3da54e8ca3
