FIFA (formerly FIFA Football) is the name of the video game series developed by Electronic Arts (EA) and published in Europe by Sega. It is widely known as the best football game series of all time. The series was first released in December 1989 and has been continuously available since, seeing more than 20 sequels released as well as remakes and reboots over the years. It has been a major part of EA's EA Sports portfolio since 1998. The series is primarily set in the real-life sport of association football (more commonly known as soccer) although the game also includes features such as U.S. football (NFL), Canadian football, association ice hockey, Australian rules football, Gaelic football and baseball. Gameplay FIFA has generally been praised for its

attractive graphics and gameplay. The earliest games are simulation-based simulations, but from the 32-bit era onwards the games move towards an arcade style of game play, with tutorials and other modes such as training mode to keep the game balanced. All the FIFA series have been football simulation games, although since the Real Football series, FIFA included other national teams such as Football League, Real Madrid and Manchester United. Some games also have additional features such as alternative kits and more realistic player movements. Real Football series The Real Football games are EA's take on the first-person football game genre. They were first released in the early 1990s, but were not as successful as EA expected. The sequels, Real Football: Road to Superbowl and Real Football 2: The Nomads, also failed to sell. In order to salvage the Real Football series, EA and its publishing partners decided to make an attempt with a sport-based game, in which they believed they would be better suited to making a success of. Real Football World Cup (1993) Real Football World Cup (1993) was the first game in the series and was developed by the Liverpool office for the PlayStation. The game contains licensed teams from the mid-nineties FIFA World Cups, such as Brazil, Argentina, and Uruguay. The game is set in the form of a parody of traditional college football, with a single four-year long season culminating in the 'FIFA World Cup' played between the winners of the club and nation qualifying rounds. Each club have their own home stadium, and, for the first time in the series, their players

were developed with the ability to not only score a goal themselves, but also take a shot
