MagiCure Power Resizer Description: MagiCure Power Resizer is the most powerful and professional Windows utility to correct all kinds of system slowdowns such as CPU overusage, lack of memory or other. The professional version of MagiCure Power Resizer is more powerful and advanced than the consumer version and comes with several additional features such as the ability to recover photos and video, audio files and compress/decompress in ZIP format, XML and EXE format and others. Top four problems that create system slowdowns are: CPU overusage, lack of memory, slow hard disk speed and slow Internet connection speed. Let's take a closer look to each one of these situations and the way to fix them in MagiCure Power Resizer. Slow hard disk. A slow and overloaded hard disk can slow down your system and cause it to run more slowly and less efficiently. Even worse, a slow hard disk can even cause your operating system to crash. Most computer users do not realize how much hard disk space their operating system needs. If you are not using a single partition, you need to calculate this space before filling it up with files. If your hard disk has a single partition, you will need to know the size of your current files (logically speaking b7e8fdf5c8
