Filmography References External links Category:Living people Category:American male film actors Category:American male television actors Category:American male stage actors Category:Year of birth missing (living people)Q: how to get data from different column in different row in mysql I want to get data from two different column in different row of mysql. I tried below query SELECT \* FROM results\_table WHERE `code`='RP' AND `value\_receives`='response' this is not giving me the result as i want but, when i did this SELECT \* FROM results\_table WHERE `code`='RP' AND `value\_receives`='response' AND `code`='RA' AND `value\_response`='a' this is giving me the result as i want but, this is showing only the answer of one question asked for RP and RA and other are not taking into account. please help me. A: You can use an OR clause to get the desired results: SELECT \* FROM results\_table WHERE `code`='RP' AND `value\_receives`='response' OR `code`='RA' AND `value\_response`='a' And while you're at it, I'd use back 04aeff104c
