Perhaps the most helpful new feature is a Field of View widget, which shows you exactly what part of your image you need to address when you're working with wide-angle landscapes, or for small objects. The biggest feature for any serious photographer will be the all-new Content-Aware tool. It is designed for large files such as a print. However, the basic versions are available to smaller files, such as Instagram. The Content-Aware tool identifies the most important bits of your image—such as important objects or recognizable faces—and then adjusts the lighting, contrast, and colors to make the rest of the image look more natural.

Creative Cloud is a service developed by Adobe, that allows users to use its software with a subscription, and it also includes tools, apps, and other elements in it. With a subscription, users can use the software with various features and use them as much as they want. With every subscription, users start with a trial version, for 30 days. In the history, Photoshop was acquired by Adobe from Macromedia in August 2004, for 1.5 billion dollars. As per the software, a subscription plan is available for a limited time for free, before it becomes paid. It comes with a certain number of days of usage in the trial, measured in **study days**. After the subscription is expired, users cannot access the features that they have paid. If users don't pay the subscription for the trial, they will lose access to the features in the trial version. For the features used by the users, they have the rights to use them, but they cannot transfer it to the commercial features. To make sure that only the paying users have access to the features, they will send a verification mail to the users, and they will have to wait for the verification mail, before they can use the features. Once the time period of the trial ends, users have to pay the subscription fees, before they can get access to the features. Every day, a subscription fee will be deducted, and users will have to pay for it. There are 5 options to pay the subscription fees, and users can choose any of these, according to their needs and preferences. The user can also switch to the features manually if they have forgotten to select any of the payment options, or they can plan their birthday and gift gifts. The monthly subscription costs varies based on the purchased features.
