What's New in the?

Say'n'Post is a small and easy-to-use Windows application that allows you to record a voice message and post it online immediately. Say'n'Post is a simple and useful solution to quickly and easily record voice messages, which can be posted to your website, your blog, or your MySpace profile. Users can also export the voice messages to the local computer and use other media players such as Windows Media Player or Winamp to play the voice message. Say'n'Post is very easy to use. Simply launch Say'n'Post and click on the microphone button to record your message. Features: * Automatic Speech Recognition (ASR) * Themes and skins * Use Voice Recorder as a shortcut menu item * Export the recorded voice message to the local computer * Send the recorded voice message via email * Post the recorded voice message to a website * Play the recorded voice message * MySpace compatibility Requirements: * Windows 98, ME, 2000, XP, Vista, 7, Windows Server *.NET Framework 2.0 SP1, 4.0 or above * Internet Explorer 6 or above * Windows Media Player 12 or above * Winamp 3 or above Pthreads 0.9.4 Michael Stefaniuc, Dan Cunningham, Tuomas Kuosmanen, Nathan Bell Description Pthreads is a C++ library for building thread-safe applications. This version provides a more solid foundation for developers and ensures that applications can be built in a thread-safe manner. In addition, it provides several features not present in the current implementation, including: * Mandatory synchronization between threads * Guaranteed mutual exclusion between threads * Implementation of C++'s thread-local storage and thread-local variables * Improved portability by avoiding use of deprecated features such as `_beginthreadex()` and `_endthreadex()` * Support for both ANSI and Unicode compilers * Support for building both 32-bit and 64-bit executables Pthreads 0.9.4 Michael Stefaniuc, Dan Cunningham, Tuomas Kuosmanen, Nathan Bell DeepCoder 6.0 Boris Naydenov, Alex P. Kravchuck, Nikita Danilov, Anton Ivanov, Egor Zakharov, Anton Charushin, Georgiy Shirv, Ruslan Akhmetov, Victor Chernyak Description DeepCoder is an audio editor for Windows. You can record, edit and mix audio. You can record any type

System Requirements:

OS: Windows 7/Windows 8.1/Windows 10 Processor: Dual core processor 2GHz or faster with at least 2GB RAM
Graphics: Direct3D 9 capable video card (nVidia: GeForce 9800GT+) with at least 512MB VRAM (not supported on all cards) DirectX: Version 9.0c Hard Drive: 1GB free HD space Additional Notes: The required size is the full size of the website that is being viewed on a resolution of 1280 x 720 pixels or better. The
