The Photoshop interface consists of a tool panel which holds the control buttons. The button bar is positioned at the top right section of the screen. On the left side of the tool panel is the palettes (or 'paint' areas). This can be split into three sections: the 'Layers' section for creating layers; the 'Colors' section for editing the color tones; and the 'Tool' section which is where most of the tools are found. The 'Origin' and 'Media' palettes are also found here. The primary tools for image editing within Photoshop design tools are the standard selection tools like the marquee tool, lasso tool, and selection tools. These tools are used to make changes to individual pixels. There is also the Brush tool which is used for creating color and line work. e3d0a04c9c
